### SECTION 4 FIRST AID MEASURES

#### Description of necessary first aid measures

Inhalation:	Keep victim calm and remove to fresh air if safe to do so. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.
Skin Contact:	If skin contact occurs, remove contaminated clothing and wash skin thoroughly with water and follow by washing with soap if available. If irritation persists, seek medical attention.
Eye Contact:	If in eyes, hold eyes open, flood with water for at least 15 minutes. Transport to nearest medical facility for additional treatment.
Ingestion:	If swallowed, do NOT induce vomiting. Rinse mouth with water. Transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.

#### Symptoms caused by exposure

Inhalation:	May cause headache, dizziness, nausea, vomiting and breathing difficulties. High doses may cause depression of the nervous system.
-------------	--

Skin:	May cause burning sensation on prolonged contact with solid.
Eye:	May include burning sensation and redness.
Ingestion:	May include headache nausea, vomiting and anaemia.

#### Medical attention and special treatment

Treat symptomatically.

---

### SECTION 5 FIRE FIGHTING MEASURES

#### Suitable extinguishing equipment

For a small fire use dry chemicals, carbon dioxide, water spray or foam. For large fires use water spray, fog or foam. Do not use water in a jet.

#### Specific hazards arising from the chemical

When heated to decomposition, emits acrid smoke and irritating fumes.

#### Special protective equipment and precautions for fire fighters

Wear full protective clothing and self-contained breathing apparatus. Hazchem code is dependent upon mode of transportation and packaging (see Section 14).

---

### SECTION 6 ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid contact with released material. Avoid breathing dust. Isolate hazard area and deny entry to unnecessary or unprotected personnel.

#### Environmental precautions

Use appropriate containment to avoid environmental contamination. Prevent from entering waterways – discharge into the environment must be avoided.

#### Methods and materials for containment and cleaning up

Use appropriate tools to put spilled solid in a convenient waste disposal container. Avoid creating dust. Ensure adequate ventilation. Dispose of in accordance with regional regulations.

---

### SECTION 7 HANDLING AND STORAGE

#### Precautions for safe handling

Avoid breathing dust. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Do not eat, drink or smoke in contaminated areas. Handle and open containers with care in a well-ventilated area. Ensure that the workplace is ventilated such that the Occupational Exposure limit is not exceeded.

#### Conditions for safe storage, including any incompatibilities

Store in a cool, well-ventilated area. Do not store near strong oxidants.

---

### SECTION 8 EXPOSURE CONTROLS AND PERSONAL PROTECTION

#### Exposure control measures

From National Occupational Health & Safety Commission (NOHSC) Worksafe Australia -  
 1,4-Dichlorobenzene: 150mg/m<sup>3</sup> (25ppm) TWA (8hr), 300mg/m<sup>3</sup> (50ppm) STEL. Carcinogen Category 3.

#### Biological monitoring

No biological limit allocated.

### Engineering controls

Ensure that adequate ventilation is provided. Maintain air concentrations below recommended exposure standards. Avoid generating and inhaling mists and vapours. Keep containers closed when not in use.

### Individual protection measures

Eye and face protection:	Wear safety goggles.
Skin protection:	Use solvent resistant gloves, nitrile for longer term protection or PVC and neoprene for incidental splashes.
Respiratory protection:	If work practices do not maintain airborne level below the exposure standard, use appropriate respiratory protection equipment. When using respirators, select an appropriate combination of mask and filter. Select a filter for organic gases and vapours (boiling point > 65°C). Respirators should comply with AS1716 or an equivalent approved by a state/territory authority.
Thermal hazards:	Not applicable.
